If you still have a demand for certain products, please get in contact with an Allied Vision Sales Representative immediately.

Orders for cameras in EOL status are confirmed and processed, depending on component availability. Apart from this, apply our [terms and conditions](#).

Possible successor

The Bonito PRO is Allied Vision's new camera series for high-speed imaging. The camera is equipped with a CoaXPress (CXP-6) interface and supports currently resolutions up to 25 mega pixels. Besides the higher bandwidth the Bonito PRO provides an extended feature set including multiple ROI and Sequencer enabling to speed up your application even further. Due to the CoaXPress interface also the system complexity is reduced, as the camera can be operated via a single cable with much longer cable distances compared to the Camera Link Full interface of the Bonito-CL.

Please check our [Bonito PRO webpage](#) for further details.
